

Continuous Commodity Index Weekly

Here in picture form is what the destruction of the middle class looks like - the collapsing Dollar has fomented another commodity bubble with prices on all "things tangible" soaring at the same time as wages remain stagnant or drop. This is the "STAGFLATION" of the late 1970's revisited with the exception of the flat wages. Purchasing power for millions of US citizens will now be eroded complements of the hucksters who manage the affairs of the nation's currency.
